SKIN CLINIC PROCEDURES

The IFC provided will indicate to you the costs associated with the procedure in which your GP has advised needs to be carried out. This amount will need to be paid and finalised on the day of the procedure taking place. On occasion during the Procedure GP may find that further investigations or procedures may be required, dependant on their findings they will advise you during your consultation what this may entail and whether any additional cost may be incurred. If histology is required, our staff will SMS you a payment link once histology results have been received by the GP, this payment will be rebated in full by Medicare and will be automatically refunded to your nominated bank account once you have processed this payment. Histology is when your GP needs to remove or send a sample of a lesion or lump to pathology for clinical assessment.
