

NO-SCALPEL VASECTOMY

with Dr George Eskander at Mead Medical

A minimally invasive option for permanent contraception

Dr George Eskander provides no-cut / no-scalpel vasectomies at Mead Medical in Kalamunda. No referral is required.

What is a no-scalpel vasectomy?

Instead of a traditional surgical incision, a very small opening is made in the skin to access the vas deferens - the tubes that carry sperm.

The tubes are divided and sealed so sperm no longer enter the semen. The procedure is performed under local anaesthetic and usually takes around 20 minutes.

No scalpel incision. No stitches.

Why choose this technique?

- Minimally invasive - a tiny opening rather than a traditional incision
- No stitches required
- Usually around 20 minutes
- Performed under local anaesthetic
- Less tissue disruption than a conventional incision technique
- Most patients return to normal day-to-day activities within a few days
- More than 99% effective as permanent contraception

Your appointment

Your consultation is an opportunity to discuss the procedure, ask questions and make sure vasectomy is the right choice for you.

There is no obligation to proceed. Depending on your preference and suitability, the procedure may be completed on the same day or booked for another date.

FEES

Vasectomy fee \$905

Estimated Medicare rebate \$87.10

Estimated out-of-pocket cost \$817.90

Important to know

A vasectomy should be considered a permanent form of contraception.

It is not immediately effective. Another form of contraception must be used until follow-up semen testing confirms the vasectomy has been successful.

Dr Eskander will discuss the procedure, recovery, potential risks and follow-up requirements with you before you proceed.
